1. About Paahibu Space

Who We Are

Paahibu Space is a youth-led, women-centered non-profit organization committed to bridging the gender gap in digital access, economic empowerment, and leadership. We equip women-owned businesses, female entrepreneurs and girls with the competencies to leverage technology for business and career growth. Our purpose is to empower African women and girls in STEM and entrepreneurship, enabling them to transform local challenges into globally impactful solutions. We aim to do this by creating inclusive environments where individuals from diverse backgrounds can develop the skills, confidence, and networks they need to succeed in using technology and beyond.

Founded in 2020, Paahibu Space was born out of a powerful sense that inability to access opportunities, discrimination, and social constraints are characteristics of women's and girls' experiences, especially, in disproportionate societies that are still in the process of advancing gender equality, Paahibu Space therefore aims to unite women, girls and young people into an organized tech and entrepreneurship environment as an expression of their potential and distinct contribution to their communities.

Our work directly tackles the economic, social, environmental and digital inequalities that hinder women's participation in the workforce, leadership and business ecosystem.

With an impact-driven approach, we empower women to leverage digital tools, foster leadership, and access sustainable economic opportunities, ensuring they are not just consumers of technology but active creators, leaders, and innovators.

2. Mission, Vision, and Core Values

Our Mission

On a mission to equip businesses and nonprofits with the competencies to leverage technology, while educating, inspiring, empowering, and shaping 5 million African women and girls in STEAM, innovation, entrepreneurship, leadership and business with knowledge, essential skills, career and entrepreneurship development opportunities to help them achieve their fullest potential, turning their communities' problems and challenges into solutions and opportunities in an evolving world.

Our Vision

A world where African women and girls thrive in STEAME (Science, Engineering, Arts/Agriculture, Mathematics, Entrepreneurship) and leadership, addressing community and global challenges through technology, and where all people can

lead free and dignified lives by inviting people everywhere to access, innovate, connect, and transform communities and systems sustainably.

Why Do We Do What We Do?

The digital economy and technological advancements are rapidly reshaping industries, yet millions of women and girls in Africa remain excluded from these opportunities due to systemic barriers, limited access to digital tools, and a lack of skills training. According to the International Telecommunication Union (ITU), women in developing regions are 20% less likely than men to use mobile internet, and in Sub-Saharan Africa, the gender gap in internet access remains at 37%. This digital divide directly impacts women's ability to participate in the global economy, access educational resources, and build sustainable businesses.

Furthermore, women remain significantly underrepresented in STEM fields and entrepreneurship. The United Nations Educational, Scientific and Cultural Organization (UNESCO) reports that less than 30% of the world's researchers in science, technology, engineering, and mathematics are women. In Africa, cultural and socio-economic barriers further prevent girls from pursuing careers in STEM, limiting their potential to drive innovation and contribute to economic transformation. Entrepreneurship is a key driver of economic development, yet women-owned businesses in Africa face greater challenges in securing funding, accessing mentorship, and integrating technology into their operations. Research from the World Bank highlights that female entrepreneurs in Africa receive only 7% of private equity and venture capital investments, despite running over 30% of businesses on the continent.

Paahibu Space exists to challenge these inequalities and empower women and girls by equipping them with the digital skills, knowledge, and networks needed to excel in STEM, business, and leadership. We believe that technology is not just a tool for innovation but a pathway to economic independence, educational access and social transformation. By fostering digital literacy, entrepreneurship, and leadership skills, we create opportunities for women to build thriving businesses, lead technological innovations, and contribute meaningfully to their communities. Our mission is rooted in the belief that when women and girls have access to the right resources, they do not only transform their own lives but also drive economic growth and societal progress.

The urgency of our work is further underscored by the evolving nature of the job market. The World Economic Forum estimates that 85 million jobs may be displaced by automation by 2025, but 97 million new roles requiring digital skills will emerge. Without intentional efforts to bridge the gender digital divide, women will continue to be left behind in this transformation. Paahibu Space ensures that African women and girls are not only included in this shift but are equipped to lead and innovate in the digital age.

Beyond the numbers, we do what we do because we see the tangible impact of our

work in the lives of the women and girls we support. We witness young girls who, after receiving mentorship and training, develop tech solutions that address pressing social challenges. We see female entrepreneurs who, through our programs, scale their businesses, secure funding, and create job opportunities for others. We hear the stories of women who, once excluded from the digital economy, now confidently navigate the world of technology, entrepreneurship, and leadership. These success stories reinforce our commitment to breaking barriers and creating a future where women and girls in Africa have equal access to opportunities, resources, and the skills needed to drive innovation and economic growth.

At Paahibu Space, we do what we do because the future of Africa depends on the inclusion and empowerment of its women and girls. By investing in their skills, education, and leadership, we are not only transforming individual lives but also shaping a more inclusive, technologically advanced, and economically resilient society, and this is where we come in.

How We Do It

a. Skills Training & Capacity Building:

- We offer structured training programs, workshops, and bootcamps focused on digital skills, STEM education, business development, Media and Information Literacy, decision-making and leadership.
- Our courses include topics such as digital business transformation, artificial intelligence, internet security, financial literacy, personal branding, countering disinformation, and entrepreneurial strategies.
- We ensure hands-on, practical learning experiences that prepare women and girls for real-world applications in technology and business.

b. Mentorship & Coaching:

- We connect women and girls with experienced mentors in STEM, business, and leadership to provide guidance and career development support.
- Our structured mentorship programs offer one-on-one coaching, group mentoring, and industry networking opportunities.
- We create a support system where mentees can learn from professionals, gain confidence, and navigate their career and business paths successfully.

c. Entrepreneurship & Business Development Support:

- We help women-owned businesses integrate technology into their

operations for increased efficiency and scalability.

- We provide business coaching, access to funding opportunities including micro-loans, and investor connections to support sustainable growth.
- Through incubation programs and accelerator initiatives, we assist women in launching and scaling successful businesses in the informal sector.

d. Community Engagement & Networking:

- We build a strong, supportive network of women and girls in STEM , advocacy and entrepreneurship to encourage collaboration and peer learning.
- Our in-person and virtual networking events create opportunities for meaningful connections, knowledge sharing, and partnerships. - We facilitate online communities where members can engage, discuss challenges, and access career and business resources.
- Promoting green and inclusive business models that empower women while addressing climate and social issues.

e. Advocacy & Policy Engagement:

- We drive conversations on gender equality in STEM, digital inclusion, and entrepreneurship through policy research and strategic dialogues.
- We collaborate with government agencies, educational institutions, and private sector partners to push for inclusive policies that support women and girls.
- Our campaigns raise awareness about the challenges women face in the digital economy and highlight the importance of gender-responsive policies.

f. Digital Platforms & E-Learning:

- We leverage technology to offer online learning resources, mentorship programs, and networking platforms that reach women across Africa.
- Our digital tools ensure that even those in remote or underserved communities can access education and career opportunities.
- We provide continuous learning opportunities through webinars, virtual training sessions, and digital resource hubs.

g. Innovation & Problem-Solving Initiatives:

- We encourage women and girls to develop innovative solutions to local and global challenges using technology and entrepreneurship. - Our hackathons, design challenges, and innovation labs provide spaces for participants to create and test ideas.

- We support early-stage innovations with mentorship, funding, and technical assistance to help turn ideas into impactful projects.

Our Core Values

- 1. Respect, Kindness and Care:** We believe in treating everyone with dignity, fostering a culture of inclusion, and creating a safe space for learning and growth. We do not rush past people's humanity to get to the "work." At Paahibu Space, we slow down long enough to see people fully, their brilliance, their fear, their exhaustion, their strength. Respect for us means we don't speak for women and girls. We listen, we stand beside them, and we create room for them to lead. Kindness is not about being nice, it's about being present. It's checking in when someone disappears from the group chat. It's saying, "rest is valid" when burnout shows up. It's asking "How are you, *really?*" and meaning it. Care, to us, is a practice. It's choosing to build programs around lived realities, not assumptions. It's showing up with empathy, not pity. It's treating every participant, partner, and team member as someone with agency, not as someone to be saved, fixed, or spoken over. We lead with care because we know change rooted in care lasts. We practice respect because we know dignity is not negotiable. We show kindness because healing has no finish line, and because the world we are building needs more softness, not more instructions.
- 2. Humility:** We recognize that change is a collective effort and remain open to learning, collaboration, and continuous improvement.
- 3. Evidence-Based Leadership:** Our work is grounded in data, research, and real-world impact, ensuring that our interventions are effective, sustainable and reflect the lived realities and experiences of the people we serve.
- 4. Co-Creation:** We collaborate with the communities we serve, valuing their insights and ensuring that solutions are built with and for them.
- 5. Accountability and Transparency:** We are open and accountable, and are committed to integrity, ethical leadership, and clear communication in all our programs, partnerships and dealings.
- 6. Lasting Impact:** Our goal is to create long-term, meaningful change in the lives of women and girls, empowering them to own and shape the future of technology, entrepreneurship, and leadership, while building their agency, voice, resilience and sustained improvement in the quality of lives of individuals and communities.

- 7. Ubuntu and Solidarity:** We have a strong belief in community, shared humanity, and collective growth. At Paahibu Space, we open our doors to every girl, woman-led business, and anyone ready to be part of an inclusive digital future. Through education, advocacy, and technology, we equip and empower individuals and create inclusive opportunities to transform their lives, businesses, and communities.

3. Focus Areas

Paahibu Space operates at the intersection of technology, education, and economic inclusion to empower marginalized groups. Our work is rooted in addressing the systemic barriers that limit women's and girls' access to economic opportunities, digital inclusion, and leadership in Africa, particularly in Ghana. Our sector-focus is intentional, each area reflects a pressing challenge faced by women and a strategic intervention to create lasting impact.

3.1 Technology and Digital Transformation

In Ghana, women are 30% less likely than men to own a smartphone and 23% less likely to use mobile internet (UNESCO, 2023). The lack of digital access and literacy locks women out of education, entrepreneurship, and employment opportunities.

Our Response:

- We train women and girls in digital literacy, e-commerce, cybersecurity, and emerging technologies to enable them to build careers, scale businesses, and access financial services.
- We establish digital hubs in underserved communities, providing women with access to the internet, training, and mentorship.
- Through policy advocacy, we push for affordable digital tools and gender-responsive digital policies to ensure inclusive participation in the digital economy.

3.2 Education and Skills Training

Women and girls in Ghana face educational inequality, limited career guidance, and a mismatch between education and labour market demands, leading to women remaining underrepresented in STEM, high-income jobs, and leadership positions.

Our Response:

- We equip women and youth with market-relevant skills, including coding, business management, design thinking, and leadership development.
- We run mentorship programs like TechsiStars, connecting girls with role models in STEM, entrepreneurship, and digital careers.

- We create alternative learning pathways through online education, allowing young women to upskill and enter competitive industries.

3.3 Microfinance and Financial Inclusion

70% of women in Ghana lack access to formal financial services (World Bank, 2023), making it difficult for them to start or scale businesses. Without financial literacy and support, many women remain trapped in cycles of debt and economic dependence.

Our Response:

- We provide financial, digital literacy and business management training, ensuring women understand the influence of technology on their businesses, budgeting, credit management, business management and operations, and investment strategies.
- Our Baabuh Enterprise Fund offers soft microloans for business formalization/business growth kits, seed funding, and access to grants for women-led businesses.
- We collaborate with banks and fintech companies to develop women-friendly financial products, reducing barriers to business financing.

3.4 Entrepreneurship, Business Incubation and Safe Spaces

Women entrepreneurs, especially those in the informal sector in Ghana face limited access to markets, funding, and digital tools. Many operate in the informal sector, making them vulnerable to economic shocks and financial instability. Also, many women face high levels of stress, workplace discrimination, and social expectations that affect their mental well-being. Women entrepreneurs and professionals often experience burnout, imposter syndrome, and limited access to mental health support. Despite the need, mental health remains stigmatized, underfunded, and inaccessible, particularly in underserved communities. Many of these women do not also have supportive networks where they can find solidarity, connectedness and experience-sharing.

In Ghana, where **73% of women work in informal sectors, only 17% have internet access** and a majority face compounded challenges of gender bias, digital exclusion, and economic vulnerability (GSS, 2022), girls and women continue to be locked out of the digital and economic revolutions shaping the rest of the country.

Our Response:

The **GROW Network – Girls and Women Rising on the Web**, is a women-led initiative by **Paahibu Space** designed to **dismantle these barriers** and build a thriving ecosystem of women entrepreneurs, creatives, freelancers, and farmers equipped for the digital economy. Through the GROW, we are reimagining unconventional spaces such as hair salons and “Dagebile”

groups as catalysts for social change, strengthening these intimate spaces where women naturally gather into safe havens for discussing critical issues. Rather than dismissing the conversations that happen while women get their hair done or participate in table banking, we strengthen these familiar environments where women already feel comfortable and connected to facilitate meaningful dialogue on governance, rights, and community development. We are pioneering a bold, feminist innovation that reimagines civic education by intentionally targeting young women who are often disengaged or excluded from political spaces. Through our Nhanga Sessions, we merge makeup artistry, personal grooming, and civic dialogue to create safe, affirming, and accessible entry points for young women to explore their political agency. These sessions, particularly popular among young women in tertiary institutions and informal settlements, use beauty culture as both an incentive and equalizer, transforming traditional civic education into a space that is enjoyable, impactful, and deeply relevant. This approach affirms that beauty and political consciousness are not mutually exclusive, but rather powerful tools when combined to expand democratic participation and feminist leadership. Our GROW Network connects women-led businesses to mentorship, funding, business incubation and market access, while integrating mental health awareness and self-care strategies into our programs, ensuring women entrepreneurs and professionals have the tools to manage stress and prevent burnout. GROW supports women in sectors such as **Agriculture, Food and Nutrition, Cosmetics and Beauty, Fashion and the Creative Industry**. These are industries where women hold deep generational knowledge, but often lack the platforms, training, and financial resources to scale.

- We create safe spaces for women through peer mentorship, support groups, and solidarity circles, where they can share challenges and access emotional support.
- GROW offers structured incubation for early-stage women-led businesses, providing mentorship, business model development, legal and branding support, and access to seed funding opportunities..
- We advocate for gender-responsive entrepreneurship policies, ensuring women receive equal business opportunities.

3.5 Green Economy and Sustainability

Climate change disproportionately affects African women, especially those in agriculture, trade, and rural businesses. Many lack access to sustainable farming techniques, green technologies, and climate adaptation strategies.

Our Response:

- We integrate climate-conscious entrepreneurship into our programs, teaching women how to build eco-friendly businesses.
- We support women farmers, agripreneurs, fashion and beauty entrepreneurs with training on sustainable agriculture, circular economy practices and integration into their businesses.

- We partner with climate organizations to ensure women are included in Africa's transition to a greener economy.

3.6 Creative Economy and Digital Media

The creative industry is one of the fastest-growing sectors in Africa, yet women remain underrepresented in digital content creation, multimedia, and arts-based entrepreneurship. Limited access to creative tools, business skills, and funding prevents women from thriving in this space.

Our Response:

- We train women in graphic design, video editing, photography, and content creation, equipping them with skills for digital storytelling and monetization.
- We support female creatives in accessing funding, branding strategies, and global markets to commercialize their work.
- Through digital media campaigns, we amplify the voices of women in entrepreneurship, STEM, and policy advocacy.

At Paahibu Space, we strongly believe that women's and girls' liberation is interconnected, and recognizing the urgency of dismantling all the systems of oppression that affect women can create an interconnected ecosystem where women can learn, earn, lead and be safe. Our programs address structural challenges while building sustainable pathways for economic empowerment, leadership, and innovation.

4. Our Impact & Achievements

Since our inception, Paahibu Space has:

- We have reached over 10,000 women and girls across 62 communities, equipping them with technology, entrepreneurship, and leadership skills. - Trained over 2,500 girls in cybersecurity, online privacy, and digital safety through initiatives like SecureTechsiStars Project, and CybersiStars Safety.
- Launched a pan-African girls' research project on online sexual exploitation, abuse, and internet governance in West Africa, contributing to policy recommendations and discussions on safer digital spaces for women.
- The Women in Digital Business Initiative has supported over 500 women-led businesses in integrating technology into their operations, improving efficiency, market access, and scalability.
- GROW has brought together over 350 women and girls, creating a network for mentorship, collaboration, and shared learning in STEM, entrepreneurship, and leadership.
- Developed online learning resources and mentorship programs to bridge the gender

digital divide, ensuring that even women in remote communities have access to training and career opportunities

5. Our Programs

GROW Program

A flagship initiative focused on creating a safe and empowering community and network for women entrepreneurs, freelancers, founders, and young professionals. GROW provides personal and professional development, business support, and networking opportunities, fostering a culture of creativity and collaboration for women in Ghana. It also addresses systemic barriers to women's economic participation through research, advocacy on gender-responsive policies and participating in national and global policy discussions, campaigns on women's empowerment and safety.

Women in Digital Business (WiDiB) Program

A 5-week intensive virtual program designed to support young women who are building small businesses or side hustles alongside school, family, or full-time work. We equip participants with the digital tools, coaching, and business strategies they need to grow sustainably, boost their income, and build visibility, without burning out. We know what it feels like to juggle multiple roles and still want more for your business. That's why WiDiB is built with care at the center, we don't just teach digital skills. We make space for well-being, grace, and community support because growth should not cost your peace.

Activities:

- Hands-on digital skills training (content creation, business automation, e-commerce, branding, phone photography/videography & more)
- Personalized coaching from women entrepreneurs and digital experts
- Access to practical tools to streamline operations, manage time, and grow visibility online
- Access to free resources like website development, templates and digital marketing tools.
- Networking and a support circle of women who truly understand the hustle, and the pressure to "do it all"
- A learning experience that honours your story, your pace, and your potential, not just your output

Women in Digital Economy Initiative (WiDEI)

The Women in Digital Economy Initiative - WiDEI is a program by Paahibu Space created for women-led businesses in the informal sector, especially those in rural

and underrepresented communities. WiDEI equips these women with the knowledge, digital tools, and practical skills needed to strengthen their businesses, access wider markets, and build economic independence through technology. Its goal is to reclaim and elevate the technologies, creativity, and entrepreneurial innovations that have always existed in our communities, the ones passed down through trade, farming, craft, markets, and storytelling. We recognize these as valid, powerful, and *indigenous technologies*, not “lesser” alternatives. Through WiDEI, we connect the worlds of tradition and modernity by grounding digital transformation in culture, community wisdom, and local resilience.

Activities:

- Business clinics held in local markets & multipurpose community spaces. Instead of expecting women to come to us, we take training to their familiar spaces, markets, community centers, churches, farms, and even homes. WiDEI adapts to women's schedules, not the other way around.
- We break down digital concepts like e-commerce, financial technology, and cybersecurity into language and analogies that resonate culturally. We teach in Waali, Dagaare, Twi, Hausa, or whichever language the community speaks, because knowledge must feel like yours to be useful.
- We organize trade-based digital incubations by helping women digitize businesses rooted in indigenous practice, like shea processing, smoked fish trade, farming, hair-braiding, herbal medicine, and bead-making and reposition them for online markets and climate-smart ecosystems.
- We develop practical tools and business models that work with or without internet access, such as WhatsApp-based shops, SMS campaign tools, or solar-powered business devices.
- We help women digitize and safeguard practices like dagebile, group savings, mobile trading, and cooperative lending, weaving fintech into tradition instead of replacing it.

TechsiStars Mentorship Program

A 4-month hybrid mentorship program for girls and young women interested in STEM and entrepreneurship.

Activities:

- Skill-building workshops on coding, design thinking, and business innovation.
- One-on-one mentorship with STEM professionals and entrepreneurs.
- Networking sessions and pitch competitions to showcase projects.

Community Ambassadors Program

A grassroots initiative where ambassadors represent Paahibu Space in their communities to promote its programs, engage stakeholders, and identify opportunities for impact.

Activities:

- Leadership and advocacy training for ambassadors.
- Community outreach and mobilization.
- Hosting events to promote gender equality, education, financial inclusion and entrepreneurship

SecureTechsiStars Project

An advocacy and community-led research driven initiative addressing online abuse and digital safety for girls and young women to build their trust, safety and confidence in leveraging social media platforms and the internet for opportunities, working closely with governments and policymakers to ensure these platforms are regulated.

6. Leadership & Organizational Structure

At Paahibu Space, our leadership team is composed of dynamic, impact-driven professionals committed to advancing digital transformation, gender equity, and economic empowerment for women and young entrepreneurs. Each member brings specialized expertise and deep-rooted passion to drive our mission forward

Hiqmat Sungdeme Saani — Executive Director

Hiqmat Sungdeme Saani is a Communications and Digital Transformation Professional and the Founder & Executive Director of Paahibu Space. With extensive experience in gender equality, digital inclusion, youth leadership, and community development, she leads the organization's strategic direction, partnerships, and program innovation.

Hiqmat holds a Bachelor of Science degree in Plant & Environmental Biology from the University of Ghana. Her work has impacted over 10,000 girls and young women across Ghana through technology, education, and leadership initiatives. She has contributed to major policy dialogues at national and global levels, including engagements with Plan International, the AU-EU Youth Platforms, and digital governance bodies.

She brings strong expertise in program design, stakeholder engagement, and community-centered digital transformation, driving Paahibu Space's mission to empower women and youth with the skills and opportunities to thrive in the digital economy.

Abdul-Gafur Saeed's Bio - Technology Development Officer

Abdul-Gafur Saeed is a software development expert and digital transformation young professional with over 4 years of experience in digital solutions development and training.

He has a strong background in web technologies, cloud computing, AI/ML and DevOps, with a passion for leveraging emerging technologies to drive community development and digital inclusion.

As the CTO at Paahibu Space, he leads the organization's technology-driven initiatives, ensuring that digital tools, training programs, and platforms effectively serve women and young entrepreneurs. This role is critical in bridging the gender digital divide by developing accessible, inclusive, and scalable digital solutions.

Ayishetu Saeed Bio - People & Operations Officer

Ayishetu Saeed is a strategic leader in women's economic and digital empowerment, with a Bachelor of Science in Computer Science from the African Leadership University and with over 3 years in program design, safeguarding and internet security. Currently serving as the Head of Programs and Influencing, she is responsible for designing, implementing, and scaling Paahibu Space's core programs in entrepreneurship, digital literacy, financial inclusion, and leadership development.

As a young woman who hails from the Central Region of Ghana, she has volunteered and interned with technology and non-profit organizations where she nurtured her interests in designing and leading impact-driven initiatives, and therefore brings deep experience in designing and leading programs, ensuring that our programs address real challenges faced by women and girls in Ghana, Influence policy discussions on gender, business, and technology, and create sustainable solutions that extend beyond training into long-term transformation.

Gifty Koufie's Bio - Finance Officer

Gifty Koufie is a recent Bachelor of Commerce graduate with a specialization in Accounting from the University of Cape Coast, where she consistently demonstrated academic excellence, earning a spot on the Dean's List in her faculty. Her passion for accounting is reflected in her understanding of financial reporting, corporate finance, and managerial economics, which she developed through her coursework and practical voluntary experiences. Due to her keen interest in becoming an accountant, she is currently pursuing her professional qualification certification with the Institute of Chartered Accountants Ghana.

As the Finance Officer at Paahibu Space, Gifty plays a vital role in ensuring that Paahibu Space remains financially sustainable and accountable.

She leads in managing budgets, grants, and financial reporting to ensure responsible resource allocation, providing support to women entrepreneurs with financial literacy and funding access programs and working with partners to secure grants, sponsorships, and long-term investments in our initiatives.

With strong expertise in finance, grant management, and sustainability planning, Gifty Koufie ensures that every investment in Paahibu Space leads to long-term impact.

In her professional journey, she has held roles that honed her skills in financial

management and analysis.

Kamile Seidu's Bio - Digital Solutions and Training Coordinator

Kamile Seidu is a front-end developer with a passion for creating pixel-perfect designs using modern web technologies such as JavaScript, ReactJS, NextJS, HTML5, CSS3 and Wordpress. He excels at transforming complex requirements into intuitive and visually appealing user interfaces.

As a recent graduate of the University of Ghana, Legon, with a Bachelor of Science in Computer Science, Kamile is currently expanding into backend development using Node.js to enhance full-stack capabilities.

As the Digital Solutions and Training Coordinator at Paahibu Space, he leads Paahibu Space in bridging the digital divide with practical Skills and tools.

Kamile's role focuses on developing and delivering training programs in digital literacy, e-commerce, and online safety, ensuring that women entrepreneurs have access to the right digital tools to scale their businesses.

Decision-making process and accountability mechanisms

1. Strategic Decision-Making:

- The Advisory Board provides high-level strategic guidance and input on major organizational decisions.
- The Founder/Director collaborates with the leadership team to develop strategies that align with the organization's mission and vision.
- Key strategic decisions are discussed with the Advisory Board for insights and

recommendations.

2. Operational Decision-Making:

- The Senior Leadership Team, led by the Director, is responsible for making day-to-day operational decisions.
- Each team lead (CTO, COO/FD, People and Culture Manager, Head of Programs and Influencing) manages decisions related to their specific areas, consulting with the Director as needed.
- Cross-functional collaboration among teams ensures that decisions are well-rounded and consider various aspects of the organization's operations.

3. Programmatic Decision-Making:

- The Head of Programs and Influencing, along with program coordinators, leads decisions on program design, implementation, and evaluation.
- Feedback from the MERLI Team, Community Ambassadors, and Community Members informs programmatic decisions to ensure relevance and impact.

4. Financial Decision-Making:

- The COO/Finance Director leads financial decision-making, including budgeting, financial planning, and expenditure management.
- Regular financial reports are reviewed by the Executive Leadership Team and Advisory Board to ensure financial health and sustainability.

5. Community and Stakeholder Engagement:

- The Community Engagement Team and Community Ambassadors ensure that community voices are included in decision-making processes.
- Regular engagement with stakeholders provides feedback and input that shapes program development and organizational strategies.

8. Our Strategic Partnerships

We believe in collaborative impact, working with key organizations, businesses, and policymakers to drive gender-responsive innovation and economic empowerment.

Our Partners Include:

International NGOs: Plan International, Mastercard Foundation, EU Global Youth Mobilization, NGO CSW/NY, FEMNET, CAMFED Ghana

Tech & Business Networks: Internet Society Ghana, Non-Profits Organizations in Ghana Network.

Policy & Advocacy Groups: Women's Changemakers for Education, Gender Is My Agenda

Campaign - GIMAC Network, Network for Women's Rights in Ghana, Women in Law and Development in Africa - WILDaf,

These partnerships help us scale our initiatives, provide funding access, and influence policy discussions at national and global levels.

9. Sustainability Plan

Paahibu Space is committed to ensuring the long-term sustainability of its programs, impact, and operations through strategic planning, resource mobilization, and strong governance. Our sustainability approach focuses on financial independence, program scalability, leadership development, and technology-driven solutions that enable us to continue empowering women and young entrepreneurs beyond short-term funding cycles.

a. Financial Sustainability

To sustain and scale our work, Paahibu Space employs a diverse funding model that integrates multiple revenue sources while maintaining financial accountability.

Key Strategies:

- **Grant Funding & Institutional Partnerships** – We continue to engage with local and international partners for funding support. - **Strategic Corporate Collaborations** – We work with businesses on mutually beneficial partnerships, including sponsorships and
- **Revenue-Generating Services** – We provide selected training programs, business development services, and digital tools on a **cost-sharing or subsidized model** to enhance financial resilience.

b. Programmatic Sustainability

- Ensuring the continuity and expansion of our initiatives is a priority. Our model is designed to adapt, evolve, and remain relevant in the face of changing economic and technological landscapes.

Key Strategies:

- **Community-Based Approach** – We focus on building locally-driven initiatives that encourage community participation and shared ownership.
- **Long-Term Knowledge Transfer** – Our programs incorporate mentorship and skills development, enabling past beneficiaries to become program facilitators.
- **Scalable & Adaptive Programs** – We continuously evaluate and refine

our initiatives to ensure relevance, efficiency, and long-term impact.

c. Leadership & Human Capital Development

A strong, mission-driven team is essential for sustainability. We invest in leadership development and internal capacity building to ensure operational efficiency and long-term growth.

Key Strategies:

- **Professional Development & Capacity Building** – Our team engages in continuous learning and leadership training.
- **Volunteer & Internship Networks** – We develop structured engagement models to leverage skilled professionals and young talent for program delivery.
- **Succession Planning** – Leadership transitions and internal development strategies ensure continuity in operations and decision-making.

d. Digital & Technological Sustainability

Technology plays a key role in expanding reach, improving efficiency, and enhancing program delivery. Paahibu Space is committed to integrating cost-effective, scalable digital solutions into its work.

Key Strategies:

- **Digital Platforms & Online Learning** – We utilize technology to enhance learning accessibility and program scalability.
- **Data-Driven Decision-Making** – We implement monitoring systems to track impact and refine interventions based on evidence.
- **Cybersecurity & Digital Safety Measures** – Our approach prioritizes **secure and responsible technology use** for organizational data protection.

e. Strategic Growth & Advocacy

To create lasting change, Paahibu Space aligns its initiatives with national and international policy frameworks while leveraging multi-stakeholder engagement for sustainability.

Key Strategies:

- **Policy Engagement & Advocacy** – We work with relevant stakeholders to amplify issues around gender, entrepreneurship, and digital inclusion.

- **Stakeholder & Ecosystem Strengthening** – We focus on building long-term alliances with key partners and networks.
- **Agility & Innovation** – Our approach remains flexible, allowing us to adapt to emerging trends and global best practices.

Paahibu Space's sustainability plan is designed to protect our long-term impact, safeguard financial resilience, and maintain strategic flexibility. By leveraging partnerships, technology, and community-driven approaches, we ensure that our mission remains viable, impactful, and scalable over time.
